Re: Deed from Lennar Homes, LLC to Heritage Harbour South Community Development District

Dear Andrew,

Please be aware that our Firm represents Lennar Homes, LLC. It has come to our attention that there are still properties in the name of Lennar Homes, LLC that we believe should be appropriately deeded to Heritage Harbour South Community Development District. We have enclosed a proposed deed for such areas with this letter. We would appreciate if you would let us know if you have any questions or comments regarding the attached deed, absent which we will execute and record the deed in the public records.

If you have any other questions or comments, please don't hesitate to contact me.

Very truly yours,

Charles Mann

**Subject: Lake Nona SMA-18 Relocation
Request for Additional Information
Application No. 210628-6639
Orange County**

Dear Mr. Ireland:

District staff reviewed the above-referenced application. As discussed with Mr. Kirby White of Donald W. McIntosh Associates on July 22, 2012, the District is requesting the following information, in accordance with Section 5.5.3.1 of the Environmental Resource Permit Applicant's Handbook Volume I (Vol. I), adopted by reference in Section 62.330.010(4)(a), Florida Administrative Code (F.A.C.), to complete the application and provide reasonable assurances for permit issuance:

1. The submitted application is a request for modification of Permit No. 48-0195-S. The project boundary spans multiple permits and applications, many of which are expired or have been converted to the operation phase. Please provide appropriate applications currently within the construction phase to be modified, or resubmit Section A of this (and/or additional) application(s) to request construction or operation of a new system, and include the appropriate permit fees for processing as a new individual environmental resource permit. [Rule 62-330.320, F.A.C.; Form 62-330.060(1), F.A.C.]
2. Commercial zoned projects shall provide at least one-half inch of dry detention or retention pre-treatment as part of the required retention / detention, unless reasonable assurances can be offered that hazardous materials will not enter the project's surface water management system. Such assurances include, for example, deed restrictions on property planned for re-sale, type of occupancy, recorded lease agreements, local government restrictive codes, ordinances, licenses, and separate containment systems designed to prevent discharge. Please revise the design of the stormwater management system to provide the required one-half inch dry pre-treatment or provide reasonable assurances that hazardous materials will not enter the project's surface water management system. (Section 4.2.2(a), Vol. II)
3. The subject property appears to be within the bounds of several FDEP impaired water bodies. Lake Okeechobee BMAP which is impaired for phosphorous and Boggy Creek (WBID 3168B) which is impaired for fecal coliform. An analysis demonstrating no net increase to annual loading rates of TN and TP will provide a presumption to meet no

increase to the impairment for fecal coliform.

Please provide an additional 50% water quality treatment volume above the amounts required pursuant to Section 4.2.1, A.H. Volume 2 and a site-specific pre- vs. post-development nutrient analysis in accordance with the procedures outlined in Appendix E - A.H. Volume 2.

4. A concurrent Individual Water Use permit application for dewatering activities was mentioned in the submitted documents. Please provide details of this application under review, to be tracked along with this application. Because of the inseparable nature of water use and surface water management, and in accordance with Subsection 2.3(b), Environmental Resource Permit Applicant's Handbook Volume II, District staff will review these applications concurrently and final agency action will be taken once both applications are deemed complete.
5. Regarding the allowable discharge, the proposed project area appears to be within the East Lake Toho basin which has an allowable discharge rate of 16.1 CSM. The documents provided reference previously approved conceptual discharge rates of 0.3 cfs/acre and 0.5 cfs/acre to Mud Lake Basin and Boggy Creek Basin respectively. Please provide excerpts of these previously approved discharge rates and reference to the appropriate application number. [Section 3.2, Vol. II]
6. Provide calculations and documentation demonstrating that the project, as proposed, meets the applicable design criteria as indicated in the District's Applicant's Handbook, Vol. II.
 - a. A skimmer is required on SWM systems serving sites with greater than 50% impervious area. [AH-II 5.1(e)]
 - b. Linear wet pond systems have a 100' minimum width requirement, measured at the control elevation. [AH-II 5.4.2(b)]
7. It appears that portions of the project area that works are being proposed on have been previously permitted and converted to operation under Permit No. 48-00195-S-35, with the Lake Nona South (Non-Res) Community Master Association, Inc. as the perpetual operation entity. Provide confirmation that the Lake Nona South (Non-Res) Community Master Association, Inc. will operate and maintain the entire modified SWM. [Section 12.3, Applicant's Handbook Vol. I]
8. Please contact Olivia Karbiener, the environmental reviewer, at okarbien@sfwmd.gov to arrange a field inspection. Prior to the field inspection, wetland boundaries should be field staked for SFWMD staff verification and approval. Section 7.1 A.H. Volume I requires the District to complete Data Form 62-330.201(1) to document the landward extent of wetlands and other surface waters. In the event that jurisdictional wetlands do occur on the site, additional information related to wetlands and potential impacts to wetlands may be required to assist Staff in their review of the proposed project. [Section C, Form 62-330.060(1), F.A.C.]
9. Please remit the remainder of the permit application fee, \$5,250.00. Permit fees may change based upon any changes to the application(s) for this project.

Advisory Comments: The following comments are advisory in nature and do not require a response to the District.

A1. As of Dec. 22, 2020, the Florida Department of Environmental Protection (DEP) has assumed authority to administer the dredge and fill permitting program under Section 404 of the Federal Clean Water Act within certain "assumed waters" in the state. Your project may fall within assumed waters.

If your project involves wetland or other surface water impacts, and if you do not already have a permit from the U.S. Army Corps of Engineers (USACE) under Section 404 of the Clean Water Act, you may need a State 404 permit.

If your project requires a State 404 permit, please complete Section I of the ERP application "Supplemental Information for State 404 Program Permits" and upload it along with other application documents to the District's ePermitting portal.

There is no need to submit a State 404 permit application if you already have an application pending with the USACE because the USACE will transfer any pending applications within assumed waters to DEP.

If you already have a 404 permit from the USACE for the same work proposed in this ERP application, then no further action is required, unless revisions are proposed to the project such that a modification to the 404 permit is required.

More information about the State 404 permitting program may be found on DEP's website: <https://floridadep.gov/water/submerged-lands-environmental-resources-coordination/content/state-404-program>.

Please contact your local DEP office for any questions regarding the need for a State 404 permit.

A2. Included with this letter/permit is a brochure from the Florida Department of Environmental Protection (FDEP) on Florida's National Pollutant Discharge Elimination System (NPDES) program for construction activities.

As the brochure indicates, the U.S. Environmental Protection Agency authorized the FDEP in October 2000 to implement the NPDES stormwater permitting program in Florida. The District is assisting FDEP by distributing this information to entities which may be subject to regulation under the NPDES program. No response to the District is required.

A "Generic Permit for Stormwater Discharge from Large and Small Construction Activities" (CGP) is required for a construction activity which ultimately disturbs an acre or more and contributes stormwater discharges to surface waters of the State or into a municipal separate storm sewer system.

The permit required under FDEP's NPDES stormwater permitting program is separate from the Environmental Resource Permit required by the District. Receiving a permit from the District does not exempt you from meeting the NPDES program requirements.

If you have any questions on the NPDES Stormwater program, call 866-336-6312 or email FDEP at NPDES-stormwater@dep.state.fl.us. For additional information on the NPDES

Stormwater Program including all regulations and forms cited in the brochure visit: www.dep.state.fl.us/water/stormwater/npdes/.

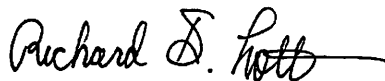

Prior to responding to this letter, please contact the assigned staff members to discuss solutions to the above questions and/or set a meeting to resolve the remaining issues: Olivia Karbiener, Environmental Analyst 3 at (407) 858-6100 x3834 or via email at okarbien@sfwmd.gov; Christopher Hardin, Staff Engineer at 407-858-6100 x3815 or via email at chardin@sfwmd.gov; and Rich Walker, Property Analyst at (561) 682-6741 or via email at rdwalker@sfwmd.gov.

Please submit the complete response electronically on the District's ePermitting website (www.sfwmd.gov/epermitting) using the 'Additional Submittals' link. Information on the District's ePermitting program is enclosed. Alternatively, please provide (1) original hard copy of the requested information, clearly labeled with the application number, to Orlando Service Center, 1707 Orlando Central Parkway, Suite 200, Orlando, Florida 32809.

If a complete response is not provided within 90 days of this letter, this application will be processed for denial, in accordance with Section 5.5.3.5 of Vol. I. If additional time is necessary, please submit a written request for an extension via the ePermitting website before the 90-day period ends, including a description of the circumstances requiring the extension of time.

For projects where more than 90 days will be needed to develop a complete application, it is recommended that the applicant withdraw the current application and resubmit a complete application at a later date. The processing fee, if paid, can be applied to a new application that is submitted within 365 days, pursuant to Rule 62-330.071(3), F.A.C. If the application is denied by the agency, fees will not be returned or credited.

Sincerely,

Richard Lott
