

The Heritage Harbour South Community Development District (CDD) would like to let you know that 5,180 linear feet of roadway has been paved recently in Stoneybrook. Additional paving in Lighthouse Cove (single-family homes) was done earlier.

Stoneybrook roadways that have been included in this project were Brookfield Terr., Bridgewater Ct., New Briton Ct., Golden Harbour Tr., Heritage Inlet Pl., Winter Haven Way and the southern portion of Heritage Isles Way. The crosswalks and Stop Bars have also been restriped.

The CDD District Engineer does an annual assessment of the roads and prepares a lifetime expectancy map for future paving. These assessments are completed in January of every year and maps will be available by contacting the District Manager Christina Newsome at the Rizzetta & Co., 813-533-2950.

In other news, the CDD has approved new Wildlife Crossing signs and is looking into Speed Bumps and Speed Signs in Stoneybrook and Lighthouse Cove.

The CDD also will be doing power washing for common-area sidewalks and all curbs and gutters.
